

# Who is Right for PowerTeacher Pro?

## POWERTEACHER PRO

*Teachers may want to switch to PowerTeacher Pro for the following benefits:*

- The application is written in HTML5 (no Java dependencies) and works on Mac, Windows, iOS, Android, and Chromebooks..
- Enhanced data visualization features, including graphs and metrics data that is readily available with colored grade scale attributes.
- Student-specific data and views that include creating assignments for individual students, and advanced single student views to see assignments, comment log, and standards report card information.
- Enhanced grade calculations that include special grade scales and unified grade scales between standards and traditional grades, as well as additional score codes to mark assignments as Incomplete and Absent.
- Enhanced workflow for commonly used tasks such as creating assignments and working with data across multiple sections at the same time, automatic course groups, sorting, and filtering.

*Districts may want to switch to PowerTeacher Pro for the following benefits:*

- Eliminates the need to update the Java application on teacher computers.
- The ability to set the grade calculations for teachers.
- Provides accessibility support for teachers with visual impairments.
- Provides the ability to build customized content for teachers.

*Should I choose*

## POWERTEACHER GRADEBOOK

*Teachers may want to continue to use PowerTeacher Gradebook in the following situations:*

- They require sending email directly from the gradebook.
- They need teacher-defined score codes, or custom grade scales.
- They need to use a shared repository of web links (Content Links).
- They need to use student groups.
- They require using Variable Credit directly from the gradebook.

*Districts may want to continue to use PowerTeacher Gradebook in part or completely in the following situations:*

- The need to use the Section Readiness report.
- The need for teachers to be able to send email directly from the gradebook.
- The need to report on Citizenship codes (*Note: Typically these can be tracked as standards instead.*)
